

## A simple and beautiful sliding action

Slido F-Flush57 with flush-mounted appearance

*At interzum 2025, Häfele will be presenting an addition to its range of sliding hardware for furniture: the brand new Slido F-Flush57 is the ideal solution for optimising space utilisation in furniture with minimal space requirements. This is because the innovative technology of the sliding furniture door fittings enables a flush design. It therefore offers not only functional, but above all aesthetic benefits for a wide range of applications in kitchens, offices, bathrooms and living rooms. Slido F-Flush57 is available from May 2025 onwards.*

Sliding door systems are a clever way of dealing with the increasing lack of space in modern kitchens, living areas and workspaces. Slido F-Flush57 allows for a uniform, smooth furniture surface, ensuring a sleek look without protruding doors. The flush-mounted Infront technology allows the doors to be opened fully, thus maximising access to the storage space.

### A wide range of applications

Slido F-Flush57 is a versatile sliding solution for a wide range of living areas and workspaces. In office settings, the fitting is ideal for sideboards, storage space solutions in partition elements or printer cabinets. In bathrooms, it is particularly beneficial for vanity units or mirror cabinets, whereby mirror fronts can also be fitted without any issues. In living areas, the Slido F-Flush57 can be used in a variety of ways in wall units, TV base units, table bases, wardrobes or for storage solutions in sloping ceilings. In kitchens, it facilitates a particularly space-saving design – for wall units, for example.

### **Straightforward manufacture and installation**

One of the major advantages of the Slido F-Flush57 is how easy it is to work with during furniture construction. Assembly can be carried out quickly and efficiently thanks to identical drilling patterns for the doors and a simple groove in the base and top cover. The ability to use extremely thin doors with a material thickness starting at eight millimetres offers additional flexibility when choosing materials.

### **Cost-efficient and durable**

Thanks to its sophisticated design, the Slido F-Flush57 comprises a small number of cost-optimised components. The simple production process makes series production straightforward and allows for cost-effective use even in price-sensitive furniture segments. Compared to competitor products with similar properties, the Slido F-Flush57 offers both a significant price advantage and a high level of quality.

### **Adaptable to individual needs**

The Slido F-Flush57 has been developed for a wide range of door formats and therefore offers a high degree of flexibility in use. Doors can be up to 880 millimetres wide and up to 1,100 millimetres high. The door thickness can vary flexibly between eight and 16 millimetres, and the system is designed for a door weight of up to six kilograms per door. Häfele uses high-quality plastic glides combined with a robust track made of powder-coated aluminium.
