## LIGHTWEIGHT AND QUIET

New cover, new core: the acoustically effective Rossoacoustic TP30 Silence room partitioning system has been completely overhauled and enhanced.

Colour has an inspirational effect and improves people's mood. The new colour schemes provided by the Rossoacoustic TP30 system create individual work islands and workplaces in open-plan offices. The result is not only an attractive interior but also acoustically pleasant surroundings.

Rossoacoustic acoustically effective room partitioning systems are already being used in many open-plan offices and agencies. Designers and users alike are excited by their simple, modular design, their lightness and their flexibility. But above all, the panels succeed in creating a balanced acoustic environment: surrounding noises are attenuated, making it much easier for employees to concentrate on their work. The Nimbus Group has now once again considerably improved its fabric-covered and acoustically effective Rossoacoustic TP Silence system: with a new core and new colours inspired by nature.

The new design of the Rossoacoustic TP30 room partitioning system, which has proved so popular and successful in office planning, literally goes right to the core. It has been on the market since October 2018 and has been given the distinguished suffix Rossoacoustic TP30 "Silence".

## ALL CHARACTERISTICS HAVE BEEN IMPROVED

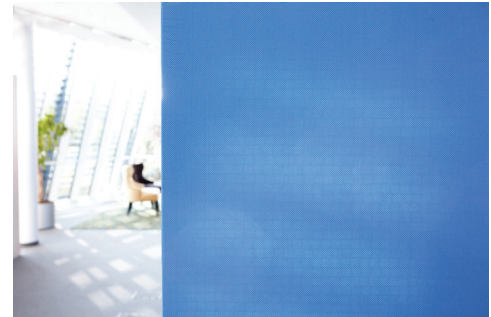

The sound-absorbing honeycomb core has been completely modified. In contrast to the original version, the structure now consists of three instead of two layers of acoustic fleece and is surrounded on the outside by a covering fleece. Both the sound-shielding and sound-absorbing characteristics have been improved. "This construction also increases the product's stability and gives the TP30 panel an unmatched lightness," according to Dietrich F. Brennenstuhl, CEO of the Nimbus Group. With its Rossoacoustic brand, the Nimbus Group has specialised in modular acoustics solutions for over 20 years now. Not only do the panels create a pleasant environment, they can also be mounted, changed around or temporarily moved and adapted to new room layouts in just a few steps.

## VINEYARD, YELLOW FIELD, FAR MOUNTAIN AND MORE: THE COLOURS OF THE NEW COVER ARE INSPIRED BY NATURE

The new core has also received a new cover: inspired by nature, nine colours have been added to the palette of the Rossoacoustic TP30 Silence. In terms of colour scheme, the panels can now be harmoniously combined with the other Rossoacoustic products: the Rossoacoustic Pads, ceiling elements or the transparent and translucent CP30 panels.

## LIGHT AND ACOUSTICS FROM A SINGLE SOURCE

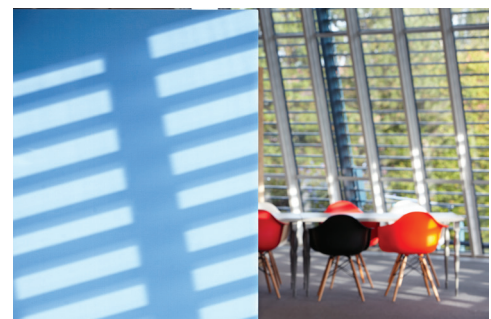

The Nimbus Group has already implemented integrated light and acoustics solutions in a large number of projects. High-quality lighting and lighting design for projects are the company's core competencies under its Nimbus brand, which perfectly complements its Rossoacoustic range. As Dietrich F. Brennenstuhl, architect and CEO of the Nimbus Group explains: "Offering both tailor-made lighting and acoustics design for specific projects from a single source makes sense and is very much appreciated by our customers." This year the Nimbus Group launched the Lighting Pad, the first product to

The dimensions and colours of the Rossoacoustic TP30 Silence panel system can be adapted to a wide range of requirements in terms of room layout and design. New strong colours inspired by nature have been added to the range – a total of nine new shades. Photo: Nimbus Group

Inspired by nature, the colour palette of the Rossoacoustic TP30 Silence has been overhauled to include nine fresh shades. In terms of colour scheme, the panels can now be perfectly combined with Rosso acoustic Pads and Lighting Pads. Photo: Nimbus Group

The Rossoacoustic TP30 Silence acoustically effective panel makes a light and vibrant impression in the new colour "Far Mountain". The great stability and unmatched low weight of the acoustic panel enable fast repositioning and simple alteration of room layouts. Photo: Nimbus Group

combine lighting with acoustic effectiveness: the Lighting Pad is suspended from the ceiling by graceful steel wires and can also be harmoniously combined with the Rossoacoustic TP30 Silence.

## SERVICE FOR ARCHITECTS, PLANNERS, FURNISHERS AND FINAL CUSTOMERS

In its role as a specialist for acoustics solutions focusing on shielding and speech intelligibility, the Nimbus Group offers its own acoustic measurements under its Rossoacoustic brand. Rossoacoustic can also help to realise professional 3D room planning based on the pCon.planner planning software. The Nimbus Group has a great deal of experience in the field of room acoustics, and this forms the basis for the guaranteed promise that the quality of acoustics – as calculated or measured – is also actually realised.

An individual option for suspension below the ceiling, especially in high rooms: the Rossoacoustic TP30 Silence system not only creates pleasant acoustics but is also predestined to be suspended from the ceiling due to its light weight. Photo: Nimbus Group

The Rossoacoustic TP30 system also works to outstanding effect when used as a conventional partition. The individual components of the modular system are fastened together using Team connectors, which can be slotted onto the panels without the use of tools. Photo: Nimbus Group

## ABOUT THE NIMBUS GROUP

The Nimbus Group was founded by the architect Dietrich F. Brennenstuhl in 1988. It is different from most other enterprises and being different has helped the company to explore new avenues. Nimbus was the very first company to place its faith in LED technology, thus giving itself a global lead over the competition. The company has realised around 15,000 LED projects since 2006 and can now call upon a wealth of experience: its spectrum ranges from fitting out houses, doctors' practices, schools and boardrooms through to company headquarters like the Unilever head office in Hamburg, the ADAC headquarters in Munich and the head office of the WTO in Geneva.

The same innovative ability also finds expression in the Rosso and Rossoacoustic brands of highly flexible shading and room-partitioning systems; this is particularly apparent in the integrated acoustics solutions, which were developed using the latest findings from science and research.

The brands in both fields – light and acoustics – have joined forces in pursuit of innovation. Together with leading research institutes, the Nimbus Group is developing acoustically effective LED lighting solutions and further new products aimed at optimising office design.

The Nimbus Group has also lived up to its role as an innovator with a whole new range of luminaires: they consistently embody the idea of battery-powered cableless light that is available whenever and wherever it is needed. With their top-quality, appealing design, the lightweight and effortlessly rechargeable luminaires fit in perfectly with the company's philosophy. The Nimbus Group is a member of the renowned "German Design Council" foundation and a founding member of the German Sustainable Building Council (DGNB).
